

To František Dobšík,
President of Czech and Moravian
Trade Union for Workers in Education

Dear Brother František,

The Trade Union of Education and Science Workers of Ukraine (TUESWU) is very grateful to the Czech and Moravian Trade Union for Workers in Education for the donation to help Ukrainian educators, internally displaced people and war victims in Ukraine.

Since the first days of the war, our Trade Union and its regional organisations have been providing humanitarian and financial assistance to our members fleeing from atrocities of the Russian aggression.

The Trade Union continues to do daily work in those regions where the security situation allows. The Trade Union offices became hubs for collecting and distributing humanitarian aid and psychological support to those in need. Educational facilities - schools, kindergartens, gyms - are provided for temporary accommodation of people from the war areas or for those people who lost their homes. whose houses were totally destroyed or damaged by bombing and shelling.

Unfortunately, the end of this war is not yet in sight. According to the requests of its regional organizations the Trade Union of Education and Science Workers of Ukraine have provided and continue to provide targeted financial assistance to those trade union members in need who requested for support: who were wounded, to the families of those educators who were killed; to those whose houses were destroyed or damaged.

Part of the money from the donation was allocated to cover the expenses of trade union resort located in Lviv where people from Eastern Ukraine have been staying now.

On behalf of Ukrainian educators, I would like to sincerely thank you for your strong support and your contribution.

Together we are a force that cannot be defeated! Let us remain united!

In solidarity,

Georgiy Trukhanov

President of the Trade Union of Education and Science Workers of Ukraine
